- Vue.js framework
- HTML5 & CSS3
- C#, .NET
- Node.js
- MySQL & mongoDB
- Agile/Scrum methodologies
- Strong teamwork skills
- Comfortable with public speaking
- Strong understanding of OOP

Projects

- **Kanban** – This is a mock-up of a Trello site where a user can plan projects for themselves or their teams. A user can login and create boards. Boards can have lists added to them that can be commented on. Front-end is vue.js and back-end is node.js.
- **Arf** – This is a CRM for a pet day-care. This tool is designed for employees to track dog check-ins/outs and daily activity. This allows users to auto create an invoice that assists with timely billing processes.
- **Keepr –** Anyone that comes to this website can view keeps(pins), but are limited to what they can do on the site. Once registered, you can make vaults(boards) where you can add keeps to that vault. You can also create keeps which can be private or public. Similar to Pinterest. Front-end is vue.js and back-end is C#.

Education

- **Certification of Completion** – BoiseCodeWorks   Jan 2019 – Apr 2019
  Full-Stack web-development student. Learned front-end and back-end coding under supervision of experienced mentors.
